## Healthy workplaces for more profitability

Dear Customers,

With our new brochure, we are delighted to give you an insight into our production range of workstation systems and introduce you in detail to our WORKFLEX brand.

For 67 years now, here at KRIEG we have been supporting our customers with the planning and realisation of professional workstation systems. What makes our 22 WORKFLEX workstation systems so distinctive is their ergonomic functionality and their quick, flexible retooling capability, making them suitable for all types of applications.

The productivity and economic viability of a production workstation are enhanced by optimising functionality levels and having an efficient supply of materials on the one hand, and by ensuring work activities are performed in an ergonomically and health-friendly way, on the other.

Did you know that a typical lost working day costs the employer between 400 and 800 euro on average? In 2021, the German Federal Institute for Occupational Safety and Health (BAuA) estimated the average incapacity to work to be 17 days per worker. Alone in 2021, this resulted in 697,9 million days of incapacity to work, entailing economic production losses totalling 89 billion euro.

Our experienced planners and field sales team specialists are on hand to function as your ergonomics coaches, ready to demonstrate the entire variety of solutions offered by WORKFLEX workstation systems. We design our solutions using the largest possible number of cost-efficient components, augmenting them with specially developed customised components where necessary. This results in your very own workstation solution, realised cost-efficiently and perfectly ergonomically tailored to your specific requirements.

You can be sure that we'll be on hand to support you from the initial consultancy, to the planning stage, up until the ready-to-use turnkey realisation of your project. It's a process that KRIEG has followed now for 67 years, with tailor-made WORKFLEX workstation systems produced in its very own German production centres.

Why not call us today at +49 (0)7033-909 46 81 - we're looking forward to talking to you!

Best wishes

Your WORKFLEX-team

## 2023 INNOVATION PRIZE IN ERGONOMICS

### All our efforts have paid dividends!

We have been awarded with the "Innovation Award for Ergonomics 2023" by the German Institute for Health and Ergonomics (IGR) for special achievements in the field of ergonomics. We are pleased to have been awarded again after the "Innovation Award for Ergonomics 2021".

More about ergonomics from page 4 onwards.

# MORE ERGONOMICS MORE ECONOMY

## WORKPLACE HEALTH IN THE SPOTLIGHT

With an ergonomic workstation from WORKFLEX, you are protecting your employees from avoidable stresses and strains, and providing them with optimum working conditions.

### YOUR BENEFITS

- ✓ Appreciably reduced physical strain
- ✓ Lower rates of absence and sick days
- ✓ Greater motivation and performance capability
- ✓ Greater productivity and added value
- ✓ Reduction of workplace-related costs

Our solution is an ergonomic workstation designed for the specific application. It also means that the working environment is individually customised for the employee. Work materials, tools, and information are all perfectly within reach, and employees are subject to less physical and mental stress.

### FACTORS THAT INFLUENCE ERGONOMICS

- ✓ Ergonomic workstation surface and chair
- ✓ Optimum grip space for supply of tools/materials
- ✓ Perfect delivery of IT/information
- ✓ Suitable workplace lighting
- ✓ Stress-relief through assist systems (Page 22)
- ✓ Interlinked workstation systems

Musculoskeletal conditions account for 23% of all medical complaints - more than any other type.

# ERGONOMIC CERTIFIED

ergonomie  
coach

Certified by IGR e.V.

### CERTIFIED ERGONOMICS COACHES

We have also arranged for its staff to be certified as ergonomics coaches by the IGR (German Institute for Health and Ergonomics). Our ergonomics coaches will devise the perfect ergonomic concept to satisfy every aspect of your workstation needs.

### SEAL OF QUALITY „ERGONOMIC PRODUCT“

Height-adjustable work tables are increasingly in demand for creating an ergonomic and highly productive work environment. We arranged for our Ergo E and Ergo K table systems to be IGR-certified (German Institute for Health and Ergonomics) in order to fulfil our customers' quality expectations.

# PROJECT REALISATION ONE-STOP SHOP

## CONSULTING

From the very outset, our workstation planners will work with you to develop the perfect solution for your requirements.

Our network of customer consultants means your needs can be documented on-site, giving you rapid assistance whenever you need it.

## PLANNING

Together, we will develop your customised workstation solution step-by-step, ensuring all necessary workplace components are included.

### CAD Visualization

Our designers can create 3D drawings and mock-ups so you can visualise the solution.

## REALISATION

Alongside our planning and consulting, we also focus intensively on the realisation aspect. Our installation specialists can also organise the on-site assembly work, so that everything fits down to the last millimetre, bang on time for the start of production.

**The benefits** +

- All accessory components in tool-less push mount design
- Rapid assembly and reconfiguration
- High stability under dynamic forces
- Portable version and table extension system
- Corner unit combo for full space utilisation
- Individual customised solutions

- Tool-less push-fit accessory components throughout
- Ergonomic flexible packing table system
- Rapid assembly and reconfiguration
- High stability under dynamic forces
- Numerous expansion components for a perfectly equipped dispatch workstation

- High stability due to self-supporting steel rack
- As individual work table or fully equipped assembly and test workstation
- Practical table extension system
- Corner unit combo for full space utilisation

- Tool-less push-fit accessory components throughout
- Rapid assembly and reconfiguration
- High stability under dynamic forces
- Functional table extension system
- Corner unit combo for full space utilisation
- Individual customised solutions

- Maximum flexibility due to aluminium profile parts and versatile connecting fittings
- Work surface adjustable for seated or standing activities
- Flexibly combinable with 4-sided mounting option for extension gantry
- Modern aluminium look

- Ergonomic sit/stand work table for prevention of posture-related physical injuries
- Extra high, low-noise height adjustment
- Control panel with 4 memory settings & USB
- Extra stable, low-vibration table frame, including in extended position
- Suitable as assembly table, test bench, or CAD work table

- Tool-less push-fit accessory components throughout
- Rapid assembly and reconfiguration
- High stability under dynamic forces
- Functional table extension system
- Corner unit combo for full space utilisation
- Individual customised solutions

- Conductive work table system - the totally safe solution for all applications
- Coordinated conductive components for optimum safety for your production activities
- High stability due to self-supporting, conductive steel rack

- Conductive work table system - the totally safe solution for all application

# WORK TABLE SYSTEM MULTIPLAN

The ergonomic workstation system for every purpose

## BENEFITS

- All accessory components in tool-less push mount design with integrated antidrop system
- Ergonomically perfectly adjustable
- Time-efficient assembly and reconfiguration guaranteed
- High stability under dynamic forces
- Optimised for seated or standing activities
- Also available in portable version

## TECHNICAL DATA

- Infinitely variable ergonomic height adjustment up to 407 mm
- Versions: Standard, Spezial, Ergo K, Ergo E
- Extremely stable, durable frame
- With expansion option: Expansion unit with 1 base frame and 2 retention frames
- Plastic base protectors for floor protection

IGR-certified versions:  
MULTIPLAN ERGO K,  
MULTIPLAN ERGO E

Further information:  
[www.workflex.de/multiplan](http://www.workflex.de/multiplan)

CONSULTING: +49 (0)7033 - 909 46 81

PLANNING PROGRAM

Available with integrated electronically controlled process lift for height adjustment for resolution of ergonomically sub-optimum postures.

# PACKING TABLE SYSTEM MULTIPLAN

Flexible packing table system for professional packing operations

## BENEFITS

- Tool-less push-fit accessory components throughout
- Ergonomically perfectly adjustable
- Time-efficient assembly and reconfiguration guaranteed
- Wide range of expansion components
- Versions with practical panel cut-out for tabletop scales
- With optional practical side table for extra flexibility and workspace
- High stability under dynamic forces

## TECHNICAL DATA

- Infinitely variable ergonomic height adjustment up to 407 mm
- Versions: Standard, Spezial, Ergo K, Ergo E
- Extremely stable, durable frame
- With expansion option: Expansion unit with 1 base frame and 2 retention frames
- Plastic base protectors for floor protection

IGR-certified versions:  
MULTIPLAN ERGO K,  
MULTIPLAN ERGO E

CONSULTING: +49 (0)7033 - 909 46 81

PLANNING PROGRAM

# WORK TABLE SYSTEM UNIVERSAL

Economically optimised and ergonomically perfected

### BENEFITS

- Suitable for all purposes
- Expandable to any size of side-by-side cluster
- Corner unit combo for full space utilisation
- For seated or standing activities
- Also available in portable version

### TECHNICAL DATA

- Extremely stable and durable steel frame
- Load-bearing capacity up to 800 kg with even weight distribution
- Infinitely variable ergonomic height adjustment up to 300 mm
- Plastic base protectors for floor protection
- Versions: Standard, Spezial, Ergo K, Ergo E

IGR-certified versions:  
UNIVERSAL ERGO K,  
UNIVERSAL ERGO E

# WORKBENCH SYSTEM PROFIPLAN

The ergonomic solution for production, repair and assembly operations

### BENEFITS

- All accessory components in tool-less push mount design with integrated antidrop system
- Time-efficient assembly and reconfiguration guaranteed
- High stability under dynamic forces
- Portable versions available

### TECHNICAL DATA

- Infinitely variable ergonomic height adjustment up to 418 mm
- Corner unit combos available
- High load-bearing capacity up to 2000 kg thanks to stable, robust workbench frame
- Versions: Standard, Spezial, Ergo K, Ergo E

IGR-certified versions:  
PROFIPLAN ERGO K,  
PROFIPLAN ERGO E

**CONSULTING: +49 (0)7033 - 909 46 81**

PLANNING PROGRAM

## TABLE ASSEMBLY SYSTEM ALU

Flexible assembly table system for sit/stand or box table

### BENEFITS

- Available as sit/stand or box table
- Maximum flexibility due to aluminium profile parts and versatile connecting fittings
- Screens for a tidy workstation
- Work surface adjustable for seated or standing activities
- Flexibly combinable extension gantry with 4-sided mounting option

### TECHNICAL DATA

- Load-bearing capacity 200 kg with even weight distribution
- Adjustable legs for floor balancing up to 17 mm
- Corner unit combos available on request
- Flexible, rugged table frame

Further information:  
[www.workflex.de/alu](http://www.workflex.de/alu)

CONSULTING: +49 (0)7033 - 909 46 81

## WORK TABLE SYSTEM E-LINE

Ergonomic workstation system for every purpose

### BENEFITS

- Ergonomic sit/stand work table for prevention of posture-related physical injuries
- Suitable as assembly table, test bench, or CAD work table
- Control panel with 4 memory settings and USB connection
- Anti-collision system with automatic stop if obstacles encountered
- Lockable with control panel key combination

### TECHNICAL DATA

- Noiseless electric height adjustment up to 650 mm
- Extra stable, low-vibration table frame, including in extended position
- Load-bearing capacity up to 200 kg with even weight distribution
- Version: E-LINE 200

# ESD WORKSTATIONS ERGONOMICALLY DESIGNED

## CONDUCTIVE – FLEXIBLE – ERGONOMIC

As a manufacturer with long-standing experience in the ESD area, we think that high-quality workstations are essential. With ESD applications such as electronic manufacturing and semi-conductor processing, it is critical to protect components from electrical discharges. So, our worktops come with an anti-static surface coating. The electric charge is diverted via an earth conductor cable. We also have a comprehensive range of ESD-protected components.

### YOUR BENEFITS

- ✓ Protection for sensitive components
- ✓ Avoidance of static charging
- ✓ Prevention of hidden damage inside the components
- ✓ Additional quality assurance

**Technical consulting:**  
**+49 (0)7033 - 909 46 81**

For more information about ESD, please visit:

## WORK TABLE SYSTEM CANTOLAB ESD

The stable, durable and clean solution

### BENEFITS

- Flexible extension gantry with 4-sided mounting option
- Easy to clean thanks to enclosed square tubular frame
- Suitable as production, test and lab bench
- Coordinated conductive components for optimum safety

### TECHNICAL DATA

- Infinitely variable clamp height adjustment up to 200 mm
- Self-supporting tubular steel frame
- Load-bearing capacity up to 750 kg with even weight distribution
- Versions: Standard, Spezial

PLANNING PROGRAM

# ASSIST SYSTEMS PERFECTLY COMBINED

## WORKSTATIONS FOR EFFICIENT PROCESSES

Our workstation systems are perfectly designed for a huge range of tasks, specifications, and requirements and can be individually adapted for employees. The ideal addition here comes in the form of worker assist systems for simplifying processes and providing workers with step-by-step guidance. This boosts productivity, considerably reduces training and introduction timeframes, while minimising error rates.

### YOUR BENEFITS

- ✓ Maximum enhancement in efficiency
- ✓ Individualised adaptations depending on task, employee and process
- ✓ Ergonomic integration of accessory components
- ✓ Various assist systems available, including pick-by-light, camera systems, etc.

**Technical consulting:**  
**+49 (0)7033 - 909 46 81**

### 1 WORKFLOW INSTRUCTIONS VIA WEB APP

Work instructions can be created, managed and executed using the web app. The worker is guided step-by-step through the process with the aid of text information, images and videos.

[www.workflex.de/arbeitsanweisung-workflex](http://www.workflex.de/arbeitsanweisung-workflex)

### 2 THE "SMART KLAUS" WORKER ASSIST SYSTEM

This cognitive worker assist system supports the digitalization of manual processes as part of industrial production. The employee is guided step-by-step through the process while a continuous image recognition system checks that every workstep has been performed correctly.

[www.workflex.de/der-schlaue-klaus](http://www.workflex.de/der-schlaue-klaus)

### 3 GOODS PICKING WITH PICK-BY-LIGHT

Pick-by-Light simplifies the picking process by dispensing with paper documents, and instead uses light indicators positioned above the merchandise box to show workers the article and quantities for picking.

# PLAN WITH PROFESSIONALS

## EXPERTISE DIRECT FROM THE MANUFACTURER

With 67 years' experience in consulting, planning and manufacturing of workstation systems, we will develop a solution optimised for you. Our experienced specialists analyse your requirements on-site, to provide you with a quotation for modular components tailored specifically for you.

Our step-by-step method of working means you can quickly and surely realise your perfect workstation. In just 9 simple steps, you can be sure you do not forget any important components or accessories.

Whenever necessary, our designers can also work with you to jointly develop an individualised tailor-made solution. And our planning specialists will draw up a quotation specifically for you, and based on professional quality CAD visualisations.

We will serve as your partner throughout the process, to realise the perfect concept for your ergonomic workstation solution.

# THE INNOVATIVE WORKFLEX METHOD

**As much STANDARD as possible, as much CUSTOMISED as necessary**

Applying the standard creates transparency and generates trust! Customer satisfaction is at the core of what we do. We determinedly create and enhance the requisite trust right across our entire value creation chain.

Individuality delivers efficient results! We ensure the greatest possible transparency by combining products from our tried and tested standard range with individual custom-made solutions.

# SAMPLE PROJECT

## M&C TECHGROUP

Added value through multi-variable ESD workstations

### The mission:

Within the new production building offering 6,000 m<sup>2</sup> of space, the focus needed to be on variably configured ESD workstations to enable the rapid initiation of production for a range of product series. The complex energy supply to the workstations was the sticking point.

### The realisation:

A prototype was used to test and perfect the special requirements for the energy supply to the workstation. Individual cable ducts and centrally located extension columns were constructed to enable the pluggable components to be used for multiple sides. The workstations were configured and assembled in a systematic and multi-variable arrangement.

### The result:

Optimally coordinated, ergonomic workstations with ESD protection for electronic components were created for the M&C Techgroup. The workstations are perfectly designed for fast and flexible retooling.

Further information:  
[www.workflex.de/techgroup](http://www.workflex.de/techgroup)

# SAMPLE PROJECT

## ROTO FRANK AG

Added value through integration into the conveyor system

**The mission:**  
Integration of packing stations that were connected to an automated conveyor line.

**The realisation:**  
The realisation took place within the logistics service centre. WORKFLEX and our customer closely consulted one another during the entire planning process.

**The result:**  
Tailor-made picking and packing workstations.

Our sophisticated, modular designed system boasts an outstanding price-performance ratio, and enables you to plan in detail while guaranteeing rapid set-up and retooling times. So changing remits can be flexibly accommodated quickly and with minimum fuss.

Further information:  
[www.workflex.de/roto-frank](http://www.workflex.de/roto-frank)

## SAMPLE PROJECT BREUNINGER

Added value through modular and expandable workstations

### The mission:

Equip a new logistic centre with approximately 400 workstation systems for economically efficient, functional and structured working methods across the various operating areas.

### The realisation:

The focus here was on efficient planning and a close, personal style of collaboration with the customer. This was accompanied by a detailed on-site analysis of the workspace, together with a field test performed with prototypes.

### The result:

Modular and expandable workstation systems based on a modular arrangement for various activity areas. Cross-over working areas were created in this way, and existing conveyor systems were rendered ergonomically compatible with the workstations.
